DETAILED ACTION

Claims 1-18 are pending in the instant application.

Priority

The claim to priority as a 371 filing of PCT/EP03/07150 filed on July 4, 2003 which claims priority to DE 102 31 292.3 filed on July 10, 2002 and DE 102 40 012.1 filed on August 27, 2002 has been acknowledged in the instant application.

Information Disclosure Statement

The Information Disclosure Statement filed on December 30, 2004 has been considered fully by the Examiner.

Reasons for Allowance

The present invention is directed to a process for the recovery of a Lewis acid from a hydrocyanation reaction mixture with process steps as defined. The closest prior art teaches a process for the recovery of a catalyst and Lewis acid from a hydrocyanation reaction mixture, but employs ammonium hydroxide instead of water in what would be step b) of the present invention. The specification of the present invention teaches that the addition of ammonium hydroxide leads to the recovery of the Lewis acid in a complex manner that requires additional steps to reuse, and that the formation of nickel complexes with ammonia leads to a more difficult recovery. Therefore, claims 1-18 are allowed.
